BESTOWMENT OF CHARITIES -The following ex tract from a report of the missionary of the "Free Episcopal Church" in the city of Boston, is worthy

of the attention of those who bestow charities:

"Another fact which I have noticed, and which is of importance to the poor, is that in the bestowment of both public and private charities,

confusion, and cheerless appearances. An old, respectable, but disabled man, applied for wood, ast winter, to the city; he and his wife had been

The reason for refusing firsh was, that they appeared decent. The man could do little or nothing, through infirmity, and the old woman, though sixty-five years of age, supported both by taking in washing. When the man urged his necessity, he was reminded that he wore a very decent coat on Sandays. Now the history of that

by those who got the wood, which was refused

possesses a greater degree of elasticity and a greater of resisting the alternations of hear cold. A chronometer with

enronometer with a giass spring. In a maintactory in France, they are now making glass pipes for the conveyance of water, which cost nearly 30 per cent less than the iron pipes now used, and will bear a far greater external pressure.

HIGH HANDED OUTRAGE-WRIT OF HABEAS CORPUS SUS-

High handed outrage—writ of Hareas Corfus suspended.—The Legislature of South Carolina, at their late session, passed a law exacting:

"That no negro or free person of color—who shall enter this State on board of any vessel, as cook, stoward, or mariner, or in any other employment on board such vessel, and who shall be apprehended or confined by any sheriff, in pursuance of the provisions of said act shall be entitled to the writ of Habeas Coupus."

The Constitution of the United States, sec. 9, declares:—

'The writ of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it."

South Carolina thus, in another instance, sets at deflance the Constitution of the United States, and abolishes the great leading feature of American liberty. The writ of habeas corpus has been allowed in that State, ever since the reign of Charles the Second.

[N. Y. Express.]

It would be difficult to conceive of a more flagrant

reign of Charles the Second. [N. Y. Express.]
It would be difficult to conceive of a more flagrant violation of the Constitution of the United States than the one above recorded. Yet because it only affects the rights of the colorod citizens of this State, who, as a class, are debarred the privilege of voting, the outrage will not call forth even a remonstrance from the democracy professing authorities of this

from the democracy-professing authorities of this State. [Alb. Eve. Journal MILLERISM IN MAINE.—There are a few leaders

of their forms.

It is evident enough that the leaders in supporting the theories of Mr. Miller in this part of the country have run into strange vagaries and have mistaken excitement for the serious impressions awakened by a belief in these theories. There are those who believe that the abandonment of some of the social virtues has been occasioned by the mistaken pursuit of excitement, and more than one family has had occasion to mourn on account of this. [Rangor Whig.

This great element in the regulation of commercial exchanges, has given rise to wonderful improvements in Mechanics, as well as to extraordinents of agricultural phenomena. In the primeval stages of its culture the seed was seprated from the fibre, only by picking with the of India, is by beating. A man manages beat out four sers, or 41 pounds a day, for which he gets paid with 62 pounds of grain. To the hunan hand succeeded the roller-then came in the United States a rude hand mill. After that Kinsey Burden, of South Carolina, constructed a roller give which enabled him to " clothe his negroes in garpieces of iron gun barrels fixed on wooden rollers, with wooden cranks to turn " in the manner of the stell corn mill."

Then came the food or treadle gin, into Georgia from the Bahamas, where it was erected and put to use under the direction of a lady, Mrs. Brisbane, who had temporarily resided at Providence, and, being of an active and inquisitive mind, had watchmarket. Bear that in mind, ve good usewives, as you go along. The next decided provement in the process of separating the seed kee from Rhode Island, but then residing in the as; and again his machine, by additional echanism, was made to feed itself, and the great dvance in power was effected by the application per! After this came improve nents by Pottle, Simpson, Nicholson and others, n quick succession, in Georgia and the Carolinas sideratum besides the increase of er has ever been to prevent injury to the stahas been fruitlessly expended by artists incited by ctation of the highest rewards, and distincon for skill and perseverance in their profession.

In 1784 an American vessel that carried eight bags ch cotton could not be the produce of the ited States! The exports from 1790 slowly but steadily increased until 1794, when a powerful impetus was given to the cotton culture by the invenon of the saw gin, by another Yankee, Eli Whitof Massachusetts. 'If we should assert,' said Judge William Johnson, 'that the benefits of this invention exceed \$100,000,000, we can prove the assertion by correct calculation."

For the silky cottons produced on the Sea Islands of South Carolina, the planter is indebted, says that accomplished planter, W. Seabrook, to the botanical skill and perseverance of Kinsey Burden, sen. of St. Johns, Colleton. His discoveries for the improvement of the staple were held to be so valuable that he was induced to offer the secret to the State for \$200,000, he resigning all his seed except what was necessary for his own crop This shows the connection of another beautiful science,

botany, with agriculture. How remarkable have been the fluctuations in the price of this great stuple of the country! In 1828, ten bags of Sea Island produced 90 cents a pound. The same planter for his two succeeding crops received \$1 and \$1 25 a pound. For two bags of extra fine in 1798 \$2 a pound was received, "the highest price ever obtained in this or any other country from which cotton wool is imported."

The Sca Island is undoubtedly superior to the best cotton produced in any part of the world where the plant gossypium (a genus of the pelyandrin order, belonging to the monoadolphia class of plants) is produced. While a pound of the best produced elsewhere can be spun into a thread of only 115 miles 2 furlongs and 60 yards, making 350 hanks to the pound, a pound of Sca Island from South Carolina has been spun at Manchester, in England, into a thread to the length of over 238

Millerism in Maine.—There are a few leaders among the Millerites in this vicinity who devote themselves to the cause by going about from place to place proclaiming the absolute certainty, according to the word of God, of the destruction of the world on a particular day within the circle of a short period. They resort to the most extravagant means for producing excitement and strongly advise all who wish to meet the Lord in peace to refrain from all labor and give themselves up to the work of preparation. At their uncettings they undertake to obey literally the commands of the Bible and to imitate as near as possible many of the acts of the Savior while on earth, and of others mentioned in the word of God. One exercise is for some of them to get upon their bands and knees on the floor while others sit astride their backs. Washing each other's feet—kissing and embracing each other, are other forms. They have an exercise called "holy rolling," and another "Sain of the Lord," when they fall upon the floor apparently helipless. In this state some of them give warnings and relate visions and recite degeted rhymes.—They have a method of expressing joy by shouting and swingting of the arms and chapping of hands. There is the holy dance practiced and the holy laugh. Frequent baptisms are observed—some at midnight, and some personal. The latter has been recently performed by certain worth, and highly accomplished young women, by junging and rolling in pool of water by the road side. Little children have been selzed and carried out into the night air and plunged into a neighboring brook. Various means are resorted to for the purpose of making sacrifices. One woman took her china te as et and broke it into small pieces. As a general thing they refrain from labor and dispose of their property apparently without a thought of its value or the labor and pains-taking it demanded to collect it. They consume their fences for fuel—have no regard to regular hours of refreshment or rest. And for all these things, they think they hav A HARD CASE.—Last week a case was brought up before the Orphan's Court of this County, which must shock the sensibilities of every right minded man. In 1839 a law was passed to prohibit free blacks from coming this this State from other States, whether to settle or not, under the penalty of twenty dollars for the first offence. If the negro be unable to pay the fine he is to be committed to jail and sold as a slave for life. The twenty dollars goes to the informer. In case the negro remains five days in the State, after his first conviction, or return into it, after his departure, he is liable to pay a fine of jied hundred dollars, one half to the informer, and on his inability to pay to be sold for life. After stating the above, we feel it necessary to assure our readers, that this is the forty-fifth year of the inneteenth continuy, and that this law exists in America, and not in any of the darkened countries of Europe.

and not in any of the darkened countries of Europe.

Last week, under this law a negro was brought before the Orphans' Court by a late Corporation constable, for having come into this State, being a free negro. The stateing come into this State, being a free negro. The statement of the poor old fellow, for he was eld and verging to the limit of his years, with little of the strength of man-hood left him, was, that he was removing his family from Virginia into Pennsylvania, having been set free for that purpose, and that he was now on his way through Maryland simply passing through the State, with no thought of harm, no knowledge of the feroclous toils of the law which hung around him. He was sentenced to pay the fine and the informer having consented to regit one half, Mr. Bromet, one of our new Whig Magistrates, generously and kindly undertook to raise the money by collection among the citizens of the town, to release the unfortunate old the citizens of the town, to release the unfortunate old man. He was of course successful in his efforts and had the exquisite enjoyment of winning blessings from a ser-rowful heart and sending the poor gray headed negro en his way rejoicing. [Frederick (Md.) Examiner, April 16.

MELANCHOLY OCCURRENCE.—On Thresday morning of last week the body of Mr. Samuel L. Lewis, printer, and recently editor of the Yanoo Democrat, was found in the vicinity of Baton Rouge, drowned. He bad for some time past shown symptoms of insanity, and on the night revious he went to the landing and fell from the steamboat Rainbow. A rope was thrown to him, but he declined to take hold of it. He has left a distressed wife and small family.

[N. O. Pic. 9th.

at the lowest rates.

Manufacturing Stationers, 77 Meiden-lane.

HULL'S TEUSSEN.—Notice to Kuptured

at the lowest raise.

All 29 Manufacturing Stationers, 27 Mendem-lane.

HULL'S TRUNSE...—Notice to kuptured Persons. Persons afflicted with Ruptures may rely upon the best instrumental aid the world affords, on application at the office, No. 4 Yeavy street, or to either of the agents in the principal towns in the United States. Be careful to examine the back pad of Hull's Trusses, to see if they are endorsed by Dr. Hull in writing. None are genume, or to be relied upon as good, without his signature.

Many persons have medertaken to vend imitations of Hull's celebrated Trusses, and thousands are imposed upon in consequence. These imitations cannot be relied upon; they are made by unskilful mechanics, and are no better than the ordinary Trusses.

Rooms have been fitted up at No. 4 Vesey street, exclusively for ladies, having a separate entrance from the business department, where a female is in constant aftendance in wait upon patients.

THOMPSON'S TRUSSES, Office 13 Feek-main in the continual properties of the first physicians.

THOMPSON'S TRUSSES, Office 13 Beekman street. About 390 of the first physicians and surgeous of New-York have given their decided preference to this Truss, as you can graduate the pressure from one to fifty pounds on the rupture, without a back pad, which does so-much injury to the spine. A fair trial being the best test of its superiority, it is applied and six days 'trial given; and if it does not retain the rupture, while performing every kind of exercise or coughing, and give perfect ease—in a word, if it is not satisfactory in every respect, the money is cheerfully returned; and this is the only condition on which you should buy any Truss. A permanent cure is easily effected, and warranted, if directions are followed.

Those sending for this Truss freed only mention the side ruptured and the measure roward the hips, as they can grad nate the pressure to suit their case. Sold wholesale and trust at 13 Beekman-st.
